

2112 Marketing came to us as one of their clients Trelleborg required a solution for their yearly events calendar.

Having looked at the shows they attend and what they wanted to accomplish at each event, we suggested a combination of a brand new 4.2m trailer for the smaller events and our modular moda structures for the larger shows such as Lamma and Cereals, both providing prospects and clients alike a great way to view Trelleborg products whilst enjoying their hospitality.

You'll see from the pictures this is a great example of how our different departments work together to provide solutions for our clients.
